Context

The beginning of the decade proved to be a time of upheaval like no other, in business and in our personal lives. For business, this comes amidst a perfect storm of disruptors that have been there for some time – digital transformation, workforce transformation, new ways of working and hyper competition, to name a few. Add to these, the global pandemic, along with political, environmental and financial uncertainty, there is a clear and urgent need for strong, supportive leadership.

Some organisations are getting it right. However, many leaders are still struggling to get the balance between how they used to do things and what needs to be done to re-orientate their businesses.

Optional supporting activity
